

CRUCIAL® MEMORY AND YOUR SYSTEM'S WARRANTY

Similar to how you can upgrade a system's preinstalled processor or graphics card and choose whichever brand you want, you can also do the same with memory and storage. It's like swapping out the batteries in your TV's remote control – you can choose whichever brand you want. Don't just take our word for it, though, when it comes to your system. Here's what the manufacturer warranties say.*

Micron® quality – a higher level of reliability

Server memory that's built to last requires lasting industry relationships and technology collaboration over multiple product cycles. As a brand of Micron, we work closely with the industry leaders in CPU and platform development, along with the leading server and motherboard manufacturers to enable the next level of memory technology. The result? More than 35 years of expertise that's poured into die selection, DRAM and PCB design, module assembly, and testing from start to finish. This can only be achieved by a true memory manufacturer – don't settle for anything less.
